INCIDENT #1

Scenario Narrative

On October 13, 2020 at 0230 hours, officers respond to the local hotel on a complaint of a disturbance. At the scene officers are directed to Room 302 where they hear loud music and unknown parties arguing inside. Officers conduct a "knock and talk" on the room and are met by an intoxicated male who opens the door. Officers observe drug paraphernalia and what appears to be illegal narcotics inside the hotel room sitting through the open door while speaking with the male.

Officers take the intoxicated male into custody and clear the room, finding two additional parties inside, another male and a female. Both the male and female appear under the influence of narcotics. Officers recover 28 grams of marijuana concentrate, 50 grams of suspected methamphetamine, 20 pills of prescription anti-depressants, 4 ounces of marijuana flower, approximately 1 ounce of Psilocybin Mushrooms, drug paraphernalia, and \$2000 in cash from the room. All three parties are taken into custody on investigative holds for possession of dangerous drugs and drug paraphernalia.

Officers contact the Regional Drug Task Force and request detectives respond to interview the arrestees. Incident to arrest, one male admits to being under the influence of marijuana and alcohol and the other admits to being under the influence of methamphetamine. The female will not admit to using narcotics or being under the influence but does imply to the Detective the parties were in town to complete a drug deal the following day.

INCIDENT #2

Scenario

On July 4, 2021 at 1030 hours officers are dispatched to the local hospital on a cold assault. Officers arrive and contact the complainant, a nurse in the Emergency Room (ER). The complainant informed officers two staff members were assaulted by a patient a couple of days prior but police were not called at the time and none of the parties were on scene. The complainant informed officers she was the staff supervisor but wasn't working at the time of the assault but was informed of the incident by staff when she returned to work today.

The complainant related to officers what she knew of the assault, which involved an unidentified White Male suspect in his early 20s who was being treated for "excited delirium" behavior possibly related to ingesting an unknown narcotic. While ER staff were treating the suspect, he became combative. Staff attempted to restrain and sedate the male but he physically resisted and assaulted one nurse by striking him in the face several times with a closed fist which caused swelling and bruising. The suspect spit on a second female nurse and damaged a Welch Allyn Pro 3400 model Vital Sign monitoring machine valued at \$1,800 before fleeing the hospital on foot in an unknown direction.

At the time of report the hospital had not been able to identify the suspect. Video evidence of the assault and the suspect being dropped off at the ER entrance was provided to responding officers and taken as evidence. Officers obtained contact information for the victims and were advised on when they could be contacted by investigators.

INCIDENT #3

Scenario

On routine patrol officers hear what sound like guns coming from a gas station nearby. Officers observe an older dark colored truck speed out of the gas station parking lot as they arrive. Bystanders approach officers and direct them to a down party near the east side of the gas station who is suffering from multiple gunshot wounds to the torso. Officers administer first aid to the victim and request EMS.

While treating the victim, witnesses tell officers the victim was observed inside a green or gray older model Ford 2-door pickup truck a few minutes before the gunshots were heard, which came from the alley behind the gas station. Officers air the vehicle information and last known direction of travel. The victim, an unidentified Asian Female approximately 50 years of age, is transported from the scene by ambulance.

Approximately 20 minutes later, officers locate a two-toned green over black 1995 Ford F150 2-Door Truck matching the description of the suspect vehicle. A felony stop is successfully conducted and Officers safely remove the sole occupant and driver, a 26-year-old non-Hispanic White Male who appears under the influence of alcohol. In plain view are a 9mm handgun on the passenger side bench seat, several spent shell casings, an AR-15 rifle, empty beer bottles, and a crack pipe on the floor of the truck. Officers take the male into custody, advise him of rights under Miranda v. Arizona, and secure the truck as a crime scene.

While transporting the male to headquarters, he makes several spontaneous utterances that “he didn’t have a choice” and “had to shoot” because the victim was really a male and he was “duped”. The suspect admits to detectives during an interview that he agreed to purchase sex and crack from the victim when he was solicited at the gas station. The suspect and victim drove into a nearby alley to smoke crack and consummate the deal when the suspect discovered the victim was a transvestite. The suspect related he “freaked” because he is a self-described “homophobe” and admitted to shooting the victim after confronting him about being a man dressed as a woman. After shooting the victim, the suspect drove back to the gas station, pushed the victim out of the vehicle, and fled before he was stopped several miles away. The suspect was booked into jail on probable cause hold for attempted deliberate homicide, assault with a deadly weapon, and possession of drug paraphernalia.

INCIDENT #4

Scenario Narrative

Officers are dispatched to the local hospital on a walk-in victim at 0515 hours. Officers contact the victim in the emergency room, a 28-year-old White Female. The victim, who was distraught and had visible injuries, related to officers the following:

She had recently ended an intimate relationship with her boyfriend, a male she identified as John Doe (DOB 04-04-1991) who she's shared an apartment with for the last two years. Both parties were on the lease to the apartment and were still living together despite the relationship having ended approximately two weeks prior. Earlier in the evening she went out with friends for dinner and drinks and returned to the apartment around 2330 hours. The victim related that, as soon as she entered the apartment, she began arguing with her ex-boyfriend who thought she had been out on a date. The victim related she eventually went into the bathroom and locked the door to get away. She stated they continued to argue through the locked door for several minutes before the ex-boyfriend eventually stormed out of the apartment stating he was going to stay somewhere else for the night. The victim verified she was alone when she locked the front door before going to sleep sometime around 0100 hours.

An unknown amount of time later the victim awoke with her ex-boyfriend straddling on top of her in the bed. The victim related there was a brief struggle before she was struck several times in the face. The victim stated her ex-boyfriend began strangling her using both hands to squeeze her throat and she struggled to breath. The victim stated she became unconscious at some point and when she awakened, she was still in bed but was no longer wearing pajamas and underwear, which had been removed and tossed in the corner. The victim stated she felt like she had been sexually assaulted and decided to come the hospital because she was experiencing vaginal and rectal pain and bleeding. The victim stated she would have called the police but she couldn't find her cellphone which she left on the kitchen counter before going to bed and was now missing. The victim drove to the hospital herself, arriving around 0400 hours. Hospital staff were the original complainants requesting police.

The victim stated her ex-boyfriend wasn't in the apartment when she regained consciousness. The victim further related she found the front door unlocked although she was 100% sure she had locked it before going to sleep. She also confirmed the ex-boyfriend still possessed keys to the apartment. The victim had visible swelling and bruising to the right orbital area of the face, petechiae marks in the eyes, eyelids, and scalp, and spoke in a raspy voice.

INCIDENT #5

Scenario Narrative

Officers receive a complaint that a local resident known to be on probation for DUI has been seen, on multiple occasions, consuming alcohol at a local bar, which is a violation of his probation conditions that he abstained from consuming alcohol. Having not witnessed the violations directly, officers take a report and forward it to the County Attorney for consideration for prosecution.

INCIDENT #6

Scenario Narrative

Railroad workers request assistance after discovering several thousand pounds of copper wire missing from a freight car at a railyard. The complainants related to officers they believe the theft occurred sometime over the weekend. Officers observe a metal fence securing the railyard is cut and tire marks indicate a vehicle and trailer were driven on the property through the breach in the security fence. A cut lock on the door to the freight car which stored the copper wire is also found at the scene.

The copper wire, in spools weighing several hundred pounds each, was stolen worth an estimated \$750,000. The workers stated it would been impossible to remove the spools without the mechanical assistance of a winch or forklift. There is no offender information.

INCIDENTS #7 & #8

Scenario Narrative

Patrol officers are dispatched to a single-family home in a residential neighborhood at 0220 hours because of an active burglary alarm. While on scene investigating the alarm, gun fire is heard from a few blocks away. Officers proceed in the direction of the gunfire and observe 17-year-old Hispanic Male sprinting away from a house with an open front door. Officers detain the male after a brief foot chase. The male is agitated, sweating profusely, and is wearing dark-color jeans, sweatshirt, gloves, beanie-style hat, and backpack. After detaining the suspect, officers investigate the house with the open front door and observe a party inside the front hallway who appears to be deceased from multiple gunshot wounds. Officers contact a 73-year-old Black Male inside the residence who admits to shooting the deceased male and is taken into custody.

Investigation revealed two Hispanic Male suspects were responsible for a string of burglaries in the neighborhood over several months. On the night of the shooting the suspects entered a residence but were scared off after triggering an audible alarm. The suspects then entered a second home two blocks to the north on the same street. The suspects made entry to this residence by forcing a rear window open and cutting the screen. The home was occupied by the owner, a single 73-year-old Black Male who awoke to crashing sounds. The homeowner confronted a single suspect at gunpoint in a hallway. It appears the now-deceased male suspect, after being confronted in the hallway, fired a single round from a .22 caliber pistol in the direction of the homeowner and was subsequently killed by the homeowner's returned gun fire. The second suspect, who was in another room of the house when the shooting occurred, fled the residence out the front door just before police arrived in the area.

The .22 caliber pistol was reported stolen from a burglary earlier in the year that occurred in an outside jurisdiction. The death of the first suspect is ruled a homicide by the medical examiner but a jury finds the homeowner was justified in using deadly force during an inquest. Prosecutors file burglary charges against the surviving male suspect.
